# TYPES OF Makeup

## Natural Makeup

Natural Makeup is very minimal and skin like. Natural makeup is a light weight base, designed to see freckles, beauty spots, etc. on the skin. Natural makeup usually consists of a very simple eye look with mascara or a few individual lashes. Minimal powder is used to create more of a dewy/skin like finish, and a very natural looking lip such as a light gloss or lip balm. PLEASE NOTE: Natural makeup is usually used in photoshoots. Natural makeup is not designed to look 'airbrushed/flawless in photos, and is not designed to last long periods of time!

## Soft Glam

Soft Glam is considered to be between natural and full glam makeup. A soft glam provides a medium coverage base which sometimes shows light freckles/beauty spots however covers blemishes. Madi's signature style of soft glam is usually set well in the centre of the face for longevity, however provides a bit of glow through the cheeks to still give a skin like and light weight finish. Soft glam to alot of peoples surprise still uses a lot of makeup, however, it is strategically placed and blended to appear lightweight and flawless. This allows for the makeup to translate well on camera and last longer throughout the day/night. Soft glam usually consists of a soft eyeshadow that still makes the eyes pop, lashes and a nude coloured lip, however comes down to each clients individual preference and look. Soft glam is considered to be the current 'trending' makeup style at the moment.

## Full Glam

Full Glam makeup provides a full coverage and airbrushed looking appearance. Full glam is desidned to completely transform the face through enhancing your features, and create that 'WOW' factor. Full glam uses a lot of setting and in depth makeup techniques to ensure it lasts all day and night! A full glam is usually matte, however highlight can be placed to give a bit of glow in the cheeks, etc. A full glam usually includes a bold eye look such as a smokey eye, wing liner, cut create or pop of colour. This also usually includes a bold lash that lifts and excentuates the eye look. A full glam translates beautifully in pictures, particularly in your flash photos.

MAKEUP IS DESIGNED TO  
CREATE CONFIDENCE.
